

TECHNICAL DATA SHEET

AQUA ROADCOAT

Revision Date: 26/08/2025

Publication Date: 19/09/16

AQUA ROADCOAT is a water-dilutable coating specially for concrete and asphalt

PRODUCT INFORMATION

| | |
|---|---------------------------------|
| Type of paint | Acrylate resin 100% |
| Color | White, yellow, green, blue, red |
| Density | 1.5-1.6 kg/L |
| Solids content | 77 m% |
| Pigment | Titanium oxide |
| Drying time (Depending on film thickness) | 10-20 min |
| Water resistant | 15 min |

BENEFITS

- ✓ Quick drying water-dilutable coating
- ✓ Good stability and viscosity
- ✓ Very good adherence on different surfaces
- ✓ Water resistant after 15 min
- ✓ Applicable with airless

DURABILITY

At least 6 months, provided that it has been stored in closed original packing at a dry and cool spot.

PACKAGING

7 KG – 25 KG
